Name/Time/Date	Text
arno 17:10 Jun 15, 2006	After upgrading to 1.1.23 landscape printing no longer works. All printers defined on the CUPS server only print portrait and crop the rest. Using <code>lp -o landscape filename</code> produces a portrait page with part of the text cropped out, i.e. the text is rotated, but the page is not.
mike 10:08 Jun 16, 2006	Please attach a sample file that does not work. Also, what version of CUPS were you using before?
